

Bio Questions for staff:

1/ where did you go school? When did you graduate?

I went to school at WCCMT Victoria campus and graduated with the class of April 2016.

2/ what type of practice do you have/what type of clinic do you work in?

I work in a multidisciplinary clinic in Oak Bay where we see a wide range of patients.

3/ what do you love about your profession/ what inspires you?

I really enjoying being able to work with and treat a wide variety of patients and pathologies. Whenever I think I have things figured out I will have a patient come in with something totally unexpected, it really keeps me on my toes!

4/ what do you like to do when you are not at work?

I love hiking and learning. If I am not out on a trail, I can be found busy in my books finishing up my Bsc in neuroscience.

5/ why do you like to teach or work with the students at WCCMT?

I love being able to share everything that was taught to me when I was a student and integrate it with everything that I have learned since then. Students are in such an exciting point in their career where all the doors are open to them and the type of therapist, they will become is still undecided. I love the thought of being able to help ease their transition toward independent practice with the experience I have gained over the years.
